Story

The dashboard displayed here offers a comprehensive analysis of the taxi industry across several major U.S. cities, segmented by gender, company, and city. The visualization neatly breaks down several key metrics such as total revenue by city, gender-based age distribution by cab company, ride distribution, and average trip costs, providing valuable insights into the taxi market.

Chapter 1: City-wide Revenues and Popularity

The journey begins in the bustling streets of major cities like New York and Chicago, where the total revenue generated by taxi rides varies significantly. New York stands out with towering revenue figures, possibly due to its high population and the inherent demand for taxi services. An interactive feature allows stakeholders to highlight specific cities, focusing on local data for deeper analysis.

Chapter 2: Gender Dynamics in the Taxi Industry

Moving on, we explore the gender-based distribution of riders across two major cab companies, Pink Cab and Yellow Ca..
